Recommendation letter

This letter is intended to serve as a reference for Otis Tarda LLC. We have cooperated with them since 2013. From earlier beginning and till now specialists of this company has been supported us on all stages, ranging from goods design to mechanical assembly of goods. By partnering with Otis Tarda for almost 2 years, we have been created and implemented several types of CT beds.

And for every project Otis Tarda demonstrated high level of production performance. They have been very reasonably priced, and have always done exactly what we've asked of them. In spite of, that medical area was new for them, we certainly can mentioned that their employees is a team of high level professionals, that could solve any needs and requests.

We really glad to recommend Otis Tarda company, like one of the most reliable suppliers.

Regards,

Michael Lubansky
Mechanical design group leader
